

Patient Name: John Doe
Date of Birth: 15th June 1985

Date: 20th October 2024

Consultant Rheumatologist: Dr. Anthony Clark
Hospital: London Rheumatology Centre

Findings:
John Doe presents with mild osteoarthritis (OA) in the right knee. Pain is managed with over-the-counter NSAIDs, but symptoms occasionally flare.

- Management Plan:**
- Continue with conservative management, including weight management and physical therapy.
 - Prescribed **Naproxen 250 mg twice daily** as needed for pain.
 - Consider hyaluronic acid injection if symptoms worsen
