

**Patient Name:** John Doe  
**Date of Birth:** 15th June 1985  
**Address:** 123 Greenway Lane, London, UK

**Date:** 10th October 2024

**Referring Doctor:** Dr. Sarah Thompson  
**Practice Address:** Greenway General Practice, London, UK

**Reason for Referral:** Hypertension and recent symptoms of joint pain

**Clinical History:**

John Doe, a 39-year-old male, has a history of hypertension for the past five years. Recently, he has reported mild joint pain in the knees, especially after physical activity. Blood pressure readings at the clinic have averaged 145/90 mmHg despite current medication.

**Current Medications:**

- Amlodipine 5 mg daily
- Losartan 50 mg daily

**Investigations Conducted:**

- Blood Test: Elevated cholesterol (Total cholesterol: 6.5 mmol/L)
- X-ray: No significant findings in the knee joint

**Plan:**

Referral to a rheumatologist for further evaluation of joint pain. Adjust hypertension medications pending specialist review.
