

Clinic Letter 3

Patient Name: John Doe

Date of Birth: 12/03/1979

Date: 15/11/2024

Referring Physician: Dr. Sarah Evans, GP

Clinic: Ophthalmology Clinic

Reason for Visit: Diabetic retinopathy screening.

History of Present Illness:

Mr. Doe is a 45-year-old diabetic patient presenting for routine eye examination. He reports blurred vision, primarily in low-light conditions, but denies any significant pain or redness. No prior history of eye diseases.

Clinical Findings:

- Visual Acuity: 20/30 in the right eye, 20/40 in the left eye.
- Fundoscopy: Mild non-proliferative diabetic retinopathy, with no macular edema.

Impression:

1. Early non-proliferative diabetic retinopathy.

Plan:

- Encourage optimal glycemic control (target HbA1c <7%).
- Schedule annual ophthalmology review.
- Recommend over-the-counter artificial tears for occasional dryness.
